

AMIR TORKAMAN

Golang Back-End Developer | Blockchain

amirtorkaman5204@gmail.com | [linkedin.com/in/amir2539](https://www.linkedin.com/in/amir2539)

Golang-focused back-end developer with 7+ years of experience building APIs, payment systems, data workflows, and high-performance web applications. Currently working at **Kuknos** on **blockchain and Stellar Network services in Go**. Strong in modular services, REST APIs, database design, caching, and performance optimization. PHP/Laravel remains supporting background; current focus is **Go and scalable blockchain backend architecture**.

EXPERIENCE

Golang Back-End Developer

Kuknos

03/2025 - Present

Go (Golang) | Blockchain | Backend APIs

- **Build Go backend services** for blockchain products connected to the Stellar Network.
- Implement API flows for wallet, payment, and blockchain operations with focus on reliability, security, and maintainability.
- Work on transaction-oriented backend logic, service modules, and integration points across blockchain systems.
- **Write modular Go code** and structure services for scalable back-end development.

Back-End Developer

Upolo

11/2023 - 03/2025 | Tehran, Iran

Laravel | Node.js | Vue.js | Tailwind CSS | WordPress

- Designed modular, event-driven backend APIs with clean service boundaries.
- Developed a modular admin panel using Vue.js and Tailwind CSS.
- Developed a messaging system with Node.js and integrated it with backend workflows.

Back-End Developer

Xino Digital

08/2021 - 03/2023 | Tehran, Iran

Laravel | PHP | WordPress | Vue.js | Node.js

- Collected and processed 2M+ data records at a daily rate of 20,000+ records.
- Designed and implemented a payment system integrating 3 payment gateways.
- Created a custom Laravel config-caching system to improve performance and efficiency.

Back-End Developer

farskala

07/2020 - 06/2021 | Tehran, Iran

PHP | WordPress | JavaScript

- Accelerated search query speed by up to 75% through optimization and plugin development.
- Built custom plugins, themes, and a warehouse management application to improve productivity.

Back-End Developer

Sookhtejet

04/2020 - 04/2021 | Remote

PHP | WordPress | Laravel | JavaScript

- Developed a RESTful API for a high-traffic application with 100,000+ users.
- Built CRM workflows, WooCommerce/RCP payment plugins, and optimized query speed by at least 30 percent.

Full-Stack Developer

Freelancer

01/2017 - 04/2020 | Remote

PHP | Laravel | WordPress | JavaScript | Vue.js

- Automated ad posting at 1,000+ ads/hour, improving operational efficiency.
- Delivered 10+ custom WordPress/WooCommerce plugins and REST APIs for client projects.

CORE SKILLS

Primary focus

Go (Golang) • Blockchain • Stellar Network

Back-end engineering

REST APIs • Event-driven architecture • Modular services • Database design • Payment systems • Caching • Performance optimization • Security-minded development

Supporting stack

PHP • Laravel • WordPress • Node.js • Vue.js • JavaScript • Tailwind CSS

EDUCATION

Master's degree, Computer Software Engineering

Islamic Azad University

09/2022

Bachelor's degree, Computer Engineering

Daneshgah-e-Semnan

01/2016 - 12/2020
